ALSO A GOOD TWO REEL COMEDY

Coming June 25-26

### REX BEACH'S

### "THE BARRIER"

### CLARESHOLM LOCAL NEWS

A. McKinney has returned from a month's trip in the States.

Mrs. Oliver Mosley left Wednesday for a trip to California.

Miss Hazel Hutton is home from Calgary to spend her holiday days.

D. McEwen is in charge of the Beaver Lumber yards during Mr. Knight's absence.

The pickup sale that was to have been held on the 26th has been postponed to a later date.

Mrs. T. E. Chilton was called to Silex, Washington, recently by the serious illness of her mother, Mrs. Mira Rogers.

Blankie, who holds equal reputation as a master of musical mechanics, will exhibit some of his handiwork in the window the last week in Clareholm.

Mrs. E. H. Mack entertained at bridge last Friday evening, in honor of Mrs. J. F. Reynolds who is leaving shortly for Oregon. Mrs. Maubin was winner of the prize.

Rex Beach's "The Barrier" is coming to the Rex theater Friday and Saturday nights, June 25-26. Norman Kerry, Lionel Barrymore and Henry B. Walthall are in the cast.

Joseph Conrad's "Lord Jim" at the Rex theater on Friday and Saturday nights this week. Percy Marmont, Shirley Mason, Noah Beery and Raymond Hatton appear in the cast.

Four boys were up in court this week charged with breaking and entering stores and other premises. Fines were imposed, which the parents paid, and the boys were put on a year's probation.

Dr. A. G. McMillan is leaving for the East July 1st, for post-graduate study. His work is being taken over by Dr. L. S. Gamble who has recently completed a year of post-graduate work in New York.

W. Knight left on Wednesday for a motor trip to Los Angeles, California. He expects to be away about six weeks. Mrs. Knight who has been visiting relatives in Los Angeles for several months, will return with him.

A public meeting will be held in the L.O.O.F. Hall, Clareholm, on Wednesday morning, June 23, at 10 o'clock, to be addressed by Premier Brownlee in the interest of the Farmers' government. Gordon B. Walker, Farmers' candidate, will also speak.

Rev. Prof. Blankie and family are leaving for Calgary at the close of this month. Blankie wishes to thank the people of Clareholm and district for the steady growth in business during last winter, and for the large number of invitations received to return again in the fall.

June rains were late in starting this year, but they are here now. Good soaking rains fell on Sunday and Monday, with showers on other days during the past week. The total rainfall of the week has been about two inches. Farmers are reaping with oats or barley fields where much damage had been done by the high winds.

The young people of the United Church were the sponsors of a pleasant evening on Thursday last in honor of Rev. Geo. Webber who is soon to leave this pastorate. The time was passed in games and music. Mr. Webber has been the young people's class leader for some time, and in remembrance of this occasion they presented him with a gold mounted fountain pen.

The members of Foot Hill Lodge No. 13, I. O. O. F. held a social on Monday evening last in honor of Rev. Geo. Webber who is leaving shortly to locate at Gleichen. The members present all expressed their regret that Bro. Webber is leaving and extended best wishes for success in his new field. The lodge presented Bro. Webber a beautiful "last Grand's collar as a token of the esteem in which he is held by his brother lodge members.

CAPT. J. T. SHAW  
Alberta Liberal Leader

### Clareholm Sports

A fair sized crowd attended the sports here on Wednesday afternoon. While the weather was nice in town, rain and hail storms in some of the rural parts of the district kept a number of people at home.

The Vulcan football team was held up on the way here by a hail storm. The Macleod baseball team was also late in arriving. So the sports were late in getting started.

There were several interesting horse races and foot races. In the novelty horse race there was some excitement furnished that was not down on the program when the saddle on one horse turned, throwing the riders, who luckily escaped serious injury.

The football game was closely contested, Vulcan winning two goals to nothing.

A good game of baseball was played between Clareholm and Macleod, the local team defeating the visitors by a score of 5 to 4.

The Golf Club dance at night was well patronized.

### Celebrate Golden Wedding

An unusual event took place in town at the home of Mr. and Mrs. John Heyland when they celebrated the 50th anniversary of their wedding. Their children and families were all present but one. Those from a distance were K. B. Heyland and family of Black Diamond, E. E. Hersch and wife, J. E. Hooper and wife, Seattle. Many congratulations were received, also a well filled purse of gold. Among the presents received was a golden teapot in the shape of a loving cup with the inscription "Golden Anniversary 1926." They were married June 12th, 1876, in Sarnia, Ont. and came west in 1902 and settled on a farm west of town.

### MARRIAGE

#### Lomheim—Edlund

On the evening of Saturday, June 12, at the United Church parsonage, the Rev. Geo. Webber united in matrimony Esther Mary, daughter of Otto D. Edlund, and Walter Leo Lomheim, son of Knut C. Lomheim, all of Clareholm.

### Chinook Gossip

Arthur Anderson's house burned down at Olson Creek a week ago Saturday, with all its contents.

Marvin Marsh and Mrs. Foster died last week. Intertown took place in the Granum cemetery.

P. A. Smith rented the Gust Kuempick farm few days ago. S. Ensminger bought a quarter of land from J. J. Goozee a few days ago. Price \$35.00 per acre.

Born, to Mr. and Mrs. Allen Allis, a week ago Saturday, a 12 pound daughter.

Tommy Dinn of this district and Miss Pearl Jacobson of Camrose, formerly of Granum, were united in matrimony last Wednesday. Mr. and Mrs. Dinn will make the Granum district their home.

The early seeded wheat in this district is so coming to head. Some of the grain will be re-seeded as we get plenty of moisture in the district.

## Tourists In Increasing Numbers Now Coming To Western Canada Are Offered Many Attractions

The mental picture of the Canadian west is a vision splendid. Were an explorer to view the scene from above, Winnipeg, the eastern gateway of the prairies, and have his range of vision sufficiently extended to take in the spread out to the westward a vast, gently rolling, fertile plain, gradually rising to the foothills of the Rocky Mountains, over one hundred miles away. On the right, the northern edge of the prairies merges into a transition zone of mixed prairie, and woodland, commonly called the park belt, and north of this, and stretching away indefinitely, is a belt of forest land, interspersed with lakes and waterways. In the extreme southwestern corner near the Rockies appear a stretch of rugged country. Fed by the melting snows and glaciers of the Rocky Mountains the majestic Saskatchewan drains the whole plain and pours its fabled waters into the Atlantic sea. Like Winnipeg to be thence discharged through the Nelson River into Hudson Bay. Through the park belt extend three transcontinental railways with innumerable branch lines crisscrossing in every direction and stretching out into the north country.

The most striking feature of the landscape viewed from above is the vast checkerboard effect produced by the system of surveys which divide the whole country into blocks one mile square, by roadways running due east-west and north-south. In these provinces the Dominion of Canada has the greatest continuous area in the world laid out in astronomically based square surveys.

Dealing with the territory by and large: the prairie is the great wheat producer; the prairie is the great stock country; about 15 per cent of the world's coal reserves; the southwest corner is the ranching country; the forest belt, north of the park lands is the chief seat of the lumbering industry, and the home of the fur-bearing; the Laurentian range across the north-east is now the scene of metalliferous mining development; and from the great rivers and lakes come the whitefish and sturgeon which supply the tables of half the continent.

The prairie, which in fifty years have advanced from a Great Canadian to be the empire's granary, wherein the production of all kinds of grain has attained to the total of almost one thousand million bushels per year, are naturally the centre of interest. In this area which has a population of over two millions, the head of the capitals of the three provinces and other centres of distribution and manufacturing; the rapid rise of which has been the romance of the past twenty-five years.

The attention of the explorer is drawn to the automobile, the modern term, now by a sight of the roads themselves, for they are, for the most part, broken by the tall verdure that the whole country appears to be covered in golden wheatfield, but because of the constant passing to and fro across the landscape of heavy machinery, weapons and of a countless number of motor vehicles of every description. Automobiles are indeed everywhere, for it is not least to be noted that the word appears to have been created for the automobile and the automobile invented for the west. The advantages of this checkerboard road system, which has done so much to assist in the rapid development of the country, are at once appreciated by the tourist, for a glance at a map or a short run along any highway shows him that in what ever direction he desires to travel he can do so as readily as he can take his way about the streets of his own home town. He sees that if he proceeds, say west, he will strike a road to a road running north and south, and that travelling on that road in either direction for a mile he will reach another crossroad parallel to the first. He need not ask questions. He simply starts his car, makes the necessary turnings and reaches his destination. It is almost impossible to lose oneself.

The tourist has before him one of the most fascinating lands imaginable. Whether he desires to travel by train or steamboat, automobile or canoe, whether his tastes incline to palatial hotels, bungalow camps, or tents, he will find ample satisfaction for every wish. Hunting, fishing and sporting activities are all easily compassed; should he be a connoisseur he can drop his trail into the Saskatchewan or the Assiniboine and paddle over in his frail outrigger even to Hudson Bay; or if he seeks a new thrill he can travel in consultation with some sportsman down the Mackenzie River system to the land of the midnight sun and the Arctic ocean.

Where every section has its tourist

area it is possible to mention only a few. In the east there are those about the three big lakes, Winnipeg, Manitoba and Winnipegosis; in the north is the rugged forest country, full of big lakes and rivers, the Mecca of the hunter and fisherman; the Saskatchewan valley is shared by all the provinces; the famous Ogishkippi valley is in the centre; and along the western edge are the Rocky Mountains and foothills. On this slope of the Rockies are the largest of Canada's national parks, Jasper Park in the north, Banff Park in the centre, and Waterton Lakes Park in the extreme south. All these recreation centres have their appeal and not least these mighty mountains, with their forested valleys, their upland gardens, their glaciers and snow fields, and their uncounted peaks, many of whose summits have never yet been scaled by man and which invite conquest by the eager and the adventurous.

Map of a portion of the three Prairie Provinces showing the network of main motor highways and railways which covers this area.

### Advantages Of Sweet Clover

(By Jas. D. McGregor, Glenbrook Stock Farms, Brandon, Manitoba)

1. Sweet clover will grow on practically all soils in Western Canada.
2. It is more easily started than alfalfa or any other clover.
3. Makes good pasture and hay.
4. All kinds of stock soon learn to like it.
5. Seeds heavily in all sections, and need easily saved.
6. Feeding value equal to alfalfa, better for pasture.
7. Starts early in spring, grows all summer and in late fall.
8. Does not bloom like alfalfa and sheep like alfalfa.
9. A blizzards leavies—fits well in rotation.
10. Roots are soft, easily inoculated, decay rapidly.
11. As green manure will add more plant food than any other crop.
12. Will smother out nearly all kinds of weeds.
13. Will prepare heavy wet alfalfa land for other crops.
14. An excellent bee pasture, making white honey.
15. Will grow where other clovers and alfalfa will not grow, on wet, alkali land. (b) On dry, stony, gumbo soil.
16. Alfalfa starts more easily than sweet clover, as the sweet clover roots are softer and more easily inoculated.
17. Sweet clover is no longer an expensive crop to grow. It is one of God's choicest gifts to man.

### Insects 'Wail For Weather

Scientists Say Moth Can Postpone Birthday For Years

Observations made by a British entomologist have led to the belief that if the weather is bad the small egg moth can postpone its own birthday for years.

The beautiful larva is always in hot water when trying to break the ice.

### Dentist Says City Smoke Injures Teeth

Smoke From Soft Coal Interferes With Ultra Violet Rays From Sun

Progress made by its adventures along the nebulous trails of pulp science has been formally charted for the year by the National Academy of Sciences.

The annual assembly of this little group of curious and thoughtful men ended recently, and they have come back to their Amoske Falls of research after exchanging specimens of the foundation stones of future practical knowledge which have been covered in the last year.

Among these, as disclosed at the concluding session, are bits of fact about sound, the ultra violet rays and the adrenal glands.

Dr. Weston A. Price, dental research worker, of Cleveland, reported he had learned that smoke from the burning of soft coal, by interfering with the ultra violet rays from the sun, was the reason that city children's teeth were more vulnerable to decay than those of their country cousins.

A man can avoid a scrape by letting his whiskers grow.

### Beckkeepers In Saskatchewan Output of Honey Last Season Was Seventy-two Thousand Pounds

The average production per hive for the past two years at the University of Saskatchewan has been about 120 pounds of extracted honey, with an estimated value of 20 cents per pound.

Bees have been kept successfully as far north as Debden on the Big River south of the C.N.R. north of Prince Albert, at Nipawin, and at Raderley, east of Tisdale. At one apary north of Raderley, as such as two tons of extracted honey have been harvested in a single season.

At other there are about nine hundred beekeepers in the province with an output of 72,000 pounds of honey.

### Hemp Growing

Two firms are interested this spring in increasing the acreage of hemp grown in Manitoba. The Manitoba Cordage Company announces that it has made contracts with a large number of farmers to grow this product, guaranteeing from \$12 to \$15 per ton for hemp straw delivered at their nearest breaking mill.

It isn't always modesty that keeps people from telling the naked truth.

## Faith In The Future Of Canada Supported By A Reference To Experience Of The United States

### Saskatchewan Butler

Interest in Dairying Increasing With Farmers Throughout the Province

With interest in dairying increasing among farmers all over Saskatchewan, creamery butter production in the province during April totaled over 1,000,000 pounds. This is an increase of 225,475 pounds, or a little better than 45 per cent over the output a year ago.

In the first four months of this year production totaled 4,318,000 pounds, or an increase of 28.3 per cent, over the output during the corresponding period last year.

Four new creameries have been opened in the province this year and five additional plants are now under way.

Seven women now hold royal crests of Great Britain.

It is always interesting to read the views of publicists in other countries on the economic situation in our own and particularly so when their views are of an optimistic and encouraging character. It is refreshing, therefore, to read in a United States contemporary, a statement of faith in the future of Canada, supported by reference to experience which the United States itself underwent before it reached its present progressive and highly economical condition.

A member of the Canadian Parliament, writes the Detroit News, states that "Canada is a vast of the United States," reporting him as saying: "We are paying tribute to the United States to the extent of \$350,000,000 every year, \$250,000,000 of which we pay in imports and \$100,000,000 in loans, borrowed, on which the News comments editorially, as follows:

"If that constitutes vassalage, then the United States is a vast of the rest of the world, chiefly Europe, for almost 100 years; for it was not until about 1850 that our exports began regularly to exceed our imports in value, and it was considerably after that date that we ceased to pay European huge dividends on borrowed capital.

"If Canada is spending \$200,000,000 a year for American goods, it is a sign that somehow or other she is making the money to pay for them. She is farming, manufacturing, exporting, creating wealth; the part of this wealth she exchanges for American products. Why does she buy these goods? Because she is not self-sufficient. Would she gain by making these goods for herself? Not unless she could make them more cheaply than she can buy them.

"If Canada is spending \$150,000,000 a year for money borrowed from the United States, it is pursuing the same course we followed while we had immense undeveloped resources and small accumulations of capital. We borrowed money because we could not get it, and paid high interest on it; but we put that money to very good use. If Canada had the same resources and capital she has borrowed from the United States, she is following a successful example. She should be thankful for by putting that money to productive work she will one day emerge from the state of 'vassalage' and be able to repay the worthy member of parliament.

"One has but to cast an eye over the map of Canada—a vast territory with extraordinary possibilities—and think of what the people of the United States did to the Great American Desert, to see that any Canadian who is pessimistic about his country is—well, to say the best, he is short of vision."

### Sunflowers For Silage

The Effect of Sunflowers on the Following Crop

Sunflowers have gained considerable promise as a silage crop during the last few years, owing largely to their hardiness, which allows them to be grown where other crops cannot make them a more certain crop. They require less moisture than corn and make a good substitute for it in districts in which the summer season is comparatively short, the nights cool and the precipitation scanty. There has been some doubt, however, as to the effect of sunflowers on the succeeding crop, as little was known of their plant food requirements. In order to determine their effect on the following crop an experiment was conducted at the Horticultural Experiment Station, Saskatoon, Saskatchewan, during the summer of 1924. Corn and sunflowers were used for comparison. In the two years of the experiment, the sunflowers and the corn crops showed somewhat higher yields than when they followed sunflowers. The difference was considerably more in the case of the sunflowers, which showed a difference of 10.8 bushels of wheat being produced following that crop compared with 11.8 bushels following sunflowers. As the experiment has lasted only two years, no definite conclusion can be drawn, but it would seem that sunflowers are not so detrimental to the soil than either corn or roots.

### Manitoba Industries

The largest group of industries in Manitoba, in number of establishments, is wood and paper products, of which there are 513 establishments, according to figures compiled by the Industrial Development Board of Manitoba, from the government industrial bureau.

Next in order come vegetable products, with 199 establishments; chemical products, with 129; and textile products, with 89.

Worried Patient—Doc, the other physician who looked at me yesterday disagreed with you on the diagnosis. He said—

Doctor—There, there, never mind. I'm sure the autopsy will prove I was right.

The test of politeness is to say "please" when that makes the telegram eleven words long.

### Many Prizes For Alberta Corn Show

Will Be Held This Year At Medicine Hat

The provincial corn show for Alberta is to be held this year at Medicine Hat under the auspices of the Alberta Corn Growers' Association. The show will include classes for the following types of corn—yellow and white flint, yellow and white dent, southwestern dent, sweet corn and popcorn. There will also be classes for shavers. In addition to cash prizes the directors hope to be able to secure several trophies as champion class awards.

### Vancouver Seeds In England

When many of the gardens in England come into bloom this year, millions of flowers from Canadian seeds will bloom among the plants of the Old Land. Canada is turning to the warm climate and rich soil of Vancouver Island for its supply of choicest seeds.

### Married Men are Nearly all Great Inventors—of excuses.

Married men are nearly all great inventors—of excuses.

### Your Tomato Plants

Advice Is Given On How To Protect Tomatoes From Diseases

The tomato plant is an exceptionally rank feeder and unless well supplied with plant food will grow feebly and become subject to disease. Sandy soil, well drained and with a plentiful application of well rotted barnyard manure. Moulded in, is the best soil for tomato growing. There are several diseases which cause considerable loss to tomatoes. An important factor in the control of these diseases is proper sanitation, according to a bulletin on tomato diseases distributed by the Publication Branch, Department of Agriculture, Ottawa. Only strong, vigorous, healthy stock should be set out in the field. All weak, sickly plants should be destroyed as soon as noticed, because most of the fungus diseases, such as leaf spot, black rot, late mould, late blight, etc., are spread from plant to plant by means of wind, rain and insects. All diseased plant material should be destroyed so that the refuse from a crop will not be left to carry the disease over to another year.

### Polished Bran Is Recommended As A Means Of Control

Cutworms rank among the worst insect pests of garden and field crops. They are general feeders, attacking all kinds of garden plants, particularly when they are young and succulent in the early part of the season. As a rule, they cease to be troublesome after the end of June. A bulletin on cutworms and their control, distributed free by the Publications Branch, Department of Agriculture, Ottawa, gives detailed information on this pest and describes the means of control. Polished bran is the best remedy for cutworms, and it should be applied as soon as their presence is indicated. For small gardens one quart of bran, one teaspoonful of Paris green, and one tablespoonful of molasses, with sufficient water to make the mixture, is sufficient. When large quantities are needed use 20 pounds of bran, 1 pound Paris green, 1 quart of molasses and 2 to 3 gallons of water. Mix the bran and Paris green thoroughly well, dissolve the molasses in the water and pour it on the mixture, stirring well. The cutworms will be in the soil during the day and come out to feed at night, therefore, the mixture should be applied immediately after sundown to get the best results. In gardens or fields containing rows of vegetables, it should be scattered thinly along the rows on either side. Flowering plants may be protected by placing a small quantity of the polished bran around, but not reaching each plant.

### Manitoba Industries

The largest group of industries in Manitoba, in number of establishments, is wood and paper products, of which there are 513 establishments, according to figures compiled by the Industrial Development Board of Manitoba, from the government industrial bureau.

Next in order come vegetable products, with 199 establishments; chemical products, with 129; and textile products, with 89.

Worried Patient—Doc, the other physician who looked at me yesterday disagreed with you on the diagnosis. He said—

Doctor—There, there, never mind. I'm sure the autopsy will prove I was right.

The test of politeness is to say "please" when that makes the telegram eleven words long.

### Fine British Types for Canada

The emigration of families from Great Britain to the Dominion is rapidly increasing. The £3 fare and generous arrangements under the 3,000 Families Scheme are inducing more to travel. Fifteen of these families sailed recently from Glasgow to Canada on the Canadian Pacific liner Montclair, and in addition there were quite a number of young fellows who were going to try their luck in the Land of Promise. The above group is a good indication of the class of sturdy energetic young men that Canada wants and that Canada is certainly getting under the auspices of the British Immigration and Colonization Association.

# Capt. J. T. Shaw's MANIFESTO.

1. Immediate examination of our provincial taxation system and adjustment on sound principles of taxing powers between the province and the municipalities.
2. Decentralization as far as practicable in the services of government, so as to secure more efficient service at less cost.
3. An immediate and long overdue reduction in taxation with special tax adjustments for sub-urban areas not suitable to intensive production.
4. A serious and determined effort to make expenditure balance income every year, not every pre-election year only, as at present.
5. The budgeting of an adequate sum every year, on the sinking fund principle to effect the retirement of our public debt within a reasonable time.
6. Realizing the primary importance of the agricultural industry, the Liberal party pledges itself to assist that industry in every reasonable way, by ensuring that co-operative marketing enterprises get a square deal, secure from unfair competition and from all partisan influence and all discrimination; by the provision of adequate facilities for marketing the farmer's produce, by establishing, in close co-operation with the Dominion government, a system of rural credits based on sound principles, by vigorous demand before the Railway Commission for needed reductions in railway and express rates and for the elimination of discriminatory freight rates; and by jealously guarding the farmer's interests in the western route, not only by zealous watching but also by proper representation.
7. The Liberal party undertakes to inspire a real leadership in educational affairs and will be prepared to make more liberal financial provision for that essential service. Also will use every endeavor to have the federal government not only continue but increase its grants for technical education. In addition there must be a closer co-ordination of the agricultural work undertaken by the university and agricultural and other schools in the province.
8. The Liberal party pledges itself to encourage an expansion in the hospital and nursing service of the province in order to promote the highest standard of public health.
9. The Liberal party has assisted in every possible way to secure the return to the province of its natural resources. This should soon be realized. If honored with public confidence the Liberal party proposes to undertake the prompt and efficient development of these resources in the public interest along sound business lines.
10. When entrusted with office the Liberal party will engage a small body of experts to examine the sources of power in the province for the purpose of evolving if possible a practical power scheme to supply cheap power to our communities for industrial and agricultural purposes.
11. The Liberal party offers a redistribution according to a definite plan on the principle of representation by population, paying however, due regard to the more sparsely settled portions, geographical area and community interest; it being understood that such redistribution will substantially reduce the number of provincial ridings.
12. The Liberal party proposes to encourage a policy of co-operative effort of all classes and their representatives in the interest of democratic legislation.
13. The Liberal party strongly favors and approves of a co-operative effort between the Dominion and Provincial governments for the purpose of securing old age pensions. The plan which has received second reading in the House of Commons is approved.
14. The Liberal party is responsible for every advance made in securing to women a larger measure of equality in political and economic matters. That policy must be continued until in every practicable way, women enjoy the full estate equality with men.
15. The Liberal party offers to the electors a policy of constructive effort and of action, and a government "of all the people, by all the people and for all the people."

Notice is hereby given that if all arrears of taxes imposed in 1925 in respect of any parcel of land situated within this municipality are not paid on or before the first day of July next, such before the first day of July next, shall be dealt with under the provisions of the Tax Recovery Act, 1922, with a view to obtaining certificates of title in the name of the municipality in respect of such parcel.  
Dated at Clareholm this 1st day of June, 1926.  
Claude J. Amundsen,  
Secretary-Treasurer,  
Town of Clareholm.

### NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of Matthew McNaught, late of near Granum, Alberta, Farmer, deceased.  
Notice is hereby given that all persons having claims upon the estate of the above named Matthew McNaught who died on the 16th day of November A.D. 1925, are required to file with the Royal Trust Company by the 19th day of July A.D. 1926, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.  
Dated this 27th day of May, A. D. 1926.  
The Royal Trust Company  
712 First Street West,  
Calgary, Alberta.  
Executors of the Will of  
Matthew McNaught, Deceased.

### ARNESTAD BROS.

Successors to R. E. Moffatt

Ready for any road

The Sealed Chassis "Shower Bath" furnishes striking proof of McLaughlin-Buick dependability.

It may be difficult to believe that any motor car chassis could run under its own power with water hitting it in a drenching shower.

But the McLaughlin-Buick chassis did it. Water cannot get in dirt cannot reach McLaughlin-Buick operating parts. Even the electrical wiring is sealed inside waterproof, fireproof, flexible tubing.

McLaughlin-Buick is ready for any road and any weather, thoroughly prepared to give a McLaughlin-Buick owners thousands and thousands of care-free, trouble-proof miles.

The new low GIAC financing rates are available to purchasers of McLaughlin-Buick on time.

The Buick McLaughlin Buick leads in registration - 11 cars in its price range.

## GREATER CONVENIENCE The Fully Automatic DELCO-LIGHT Starts, Runs, Stops Automatically

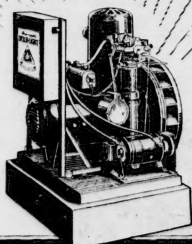

THE new automatic Delco-Light offers you in most convenient form the manifold benefits of electric light and power which Delco-Light has brought to over a quarter-million homes. It is fully automatic, starts, runs, stops, at the touch of a button. It has no battery. Its motor is air-cooled. It starts itself whenever an electric light button is pressed or current for power is turned on. It runs as long as current is being used and stops when the current is turned off. Its price is low.

There are also Delco-Light battery plants in several sizes—a self-cranking plant without storage batteries—a type and size for every purpose and every purse. Write today for full information, including Delco-Light's low prices and easy terms.

Delco-Light Company of Canada Ltd.

### PROVINCE OF ALBERTA DEPARTMENT OF MUNICIPAL AFFAIRS

Notice is hereby given that unless all arrears of taxes imposed in respect of any parcel of land

situated in Improvement District No. 100, 101, 130, 131, in the Province of Alberta, are paid on or before the First day of July next, such land will be dealt with under the provisions of the Tax Recovery Act, being Chapter 122, Revised Statutes of Alberta, 1922.

with a view to obtaining Certificates of Title in the name of the Crown in the right of the Province of Alberta in respect of such parcel.

W. D. Spence,  
Deputy Minister of Municipal Affairs.

WORLD HAPPENINGS  
BRIEFLY TOLD

Prince Christian Kraft, Hohenzollern, Duke of Ujest, and rated the wealthiest man in Germany, is dead.

A deadlock has been reached over duplication of the Pacific cable from Pili to Canada, and Imperial Conference may not deal with matter.

A shipment of two hundred tons and pounds of Argentine corned beef has arrived in Vancouver for local distribution. This is the first direct shipment of this commodity to Vancouver.

Pity head of livestock were created in a fire that destroyed a stock barn operated near MacDonald, Man., by Stewart and Cameron, Limited, of Winnipeg. The loss will run into thousands of dollars.

No official confirmation is available from governmental circles to the cable report from London that Viscount Willington would be Canada's next governor-general, succeeding Lord Byng of Vimy.

It is stated in Manitoba Government circles that an effort will be made to enlist the support of Ontario in the fight being waged by the three prairie provinces for "blue sky" legislation to control sales of shares.

Spain's representative informed the commission charged with studying reorganization of the League of Nations Council that unless she is accorded a permanent council seat Spain will be convinced that it is not useful to collaborate longer with the league.

Answering a question in the House of Commons, Hon. Charles Dunning, minister of railways, stated that the government had no information of any proposal by the Canadian Pacific Railway to construct a new line from Winnipeg to the Pacific coast.

The pupal mucus to Mexico, the Right Rev. George Curran, left for Washington. Monsignor Curran was ordered expelled from the country, allegedly for having entered Mexico in an improper manner in contravention of the clauses of the Mexican constitution dealing with foreign ministry of the gospel.

Prediction That Chicago  
Will Be Submerged

Scientist Says That Earth's Movements Is Causing South Shore of Great Lakes to Be Sinking

"Chicago is being bludgeoned today for stealing water from the Great Lakes. A future day will see that city not only in possession of all the water it needs, but more than it wants, for it will be submerged under Lake Michigan." This was a statement made by Professor Goodwin, of Toronto, in a lecture at Fort William. He declared that facts of scientific nature already known to science pointed out that the north shore of Lake Superior was gradually rising, while the south shore was sinking.

Canada was getting more land and the United States being land in a corresponding amount, due to these earth movements. Within probably 50,000 years, the St. Lawrence waterway would be totally dried up and the waters of the Great Lakes would flow south towards the Gulf of Mexico. Vessels would pass over the present site of Chicago.

May Salvage Turco-Egyptian Fleet  
In Navarino Bay. In 1827, the Turco-Egyptian fleet was sunk in a naval battle. The Greek Government has issued a proclamation inviting salvage firms to submit tenders for the raising of the remnants.

Candellia was used in making candles and polishes, is obtained from a weed which grows abundantly in Northern Mexico.

A lot of men who only sell and while the meat would cost surgeons if properly trained.

W. N. U. 1620

## TIPPITY-WITCH IRENE

THAT FRESH EGG HAS BEEN FOUNDED ME ALL AFTERNOON 'S IT TIME TO PUT THE SKIDS UNDER HIM?

HOW DO YOU DO? I HAVEN'T MET BEFORE

WHY—YES—BELIEVE WE HAVE!

LET'S SEE? WAS IT IN HOLLYWOOD OR MONTE CARLO?

OH—I REMEMBER?

HAVEN'T I SEEN YOU IN THE ZOO?

## Would Substitute Law For War

Women of Britain Joining in Peace-makers' Pilgrimage to London  
"Law, not War" has been adopted as the slogan of the Peace-makers' Pilgrimage of the women of Great Britain who assembled in Hyde Park, London, June 19. Some of the pilgrims from Scotland plan to walk most of the way.

There will be five main routes for pilgrims to travel, all centering on London. Local committees in Scotland and England have been formed to mobilize the pilgrims and escort the marchers. The meeting, expected to be attended by 100,000 women, will demand that law be substituted for war; that the British Government agree to submit all international disputes to courts of arbitration or conciliation, and shall further take the lead in the proposed disarmament conference.

## London Dealers Sell Wonderful Jewels

Gems Worth Millions Property of Mysterious Eastern Potentate  
Jewels valued at \$5,000,000, the property of an eastern potentate, whose identity is kept a close secret, are being sold in London. Gems worth \$250,000 already have reached London, and mostly were disposed of by dealer. Another \$2,500,000 shipment is expected to arrive within the next few months.

One of the most beautiful jewels in the collection awaiting sale in London is a stomacher of diamonds, emeralds and rubies. It is composed of more than 2,000 stones, the center one being a magnificent oblong emerald, surrounded by diamonds and linked up by three rows of diamonds with drop emeralds from which to hang tiny emeralds.

## Largest Nursery Business

Largest Nursery Business in Western Canada Carried On At Estevan  
What is claimed to be the largest nursery business in Western Canada has been developed at Estevan by a settler who came to Canada from Valley City, North Dakota, 15 years ago and commenced on the bare prairie. His nurseries now cover over 700 acres of land and, in addition, supplying Saskatchewan demands, nursery stock is shipped in carload quantities to the United States. The success of this enterprise is attributed to part to good management and also largely to the demand of successful western farmers for shade trees and fruit trees which will be healthy and improve their prairie farms. Known as the Prairie Nurseries, this firm has recently shipped a carload of cypresses to the United States, and as far as is known this is the first time that cypresses have been exported from Western Canada.

## Handshaking Is Hard Work

Prince of Wales Not Only One to Be Incapacitated by Custom  
The decision to abandon the White House custom of indiscriminate handshaking was bound to be made sooner or later, for it had become a menace to the health of both the president and his wife. At the first reception after the war President Harding shook 6,500 hands at the rate of 30 per minute. President Wilson walked he could get a glow with steel fingers. The wife of President Cleveland found her right hand getting larger than her left as the result of much strenuous salutation, and took violent lesions to reduce the disparity. Mrs. Harrison, after the first experience, evaded the ordeal by holding a fan in one hand and a bouquet in the other. We remember how the Prince of Wales was similarly incapacitated during his visit to Canada by the too hearty grip of welcome—London Daily Chronicle.

Happiness comes to you as a result of earning it, not as a result of willing it.

A gallon of sea water contains approximately a quarter pound of salt.

The Charm of Soft Fabric

New fashions are soft and fluffy with flowered materials and flares. The frock presented here is sure to take the eye of the male and little woman. First, because of its absolute simplicity of line, and second, because of the loveliness of its material. A wide ribbon sash is tied at the low waistline, where it is gathered into a slender bow. The bodice neck is finished with a narrow binding of the same plain material as the flared sleeves. No 1251 is in sizes 16, 18, and 20 years. Size 18 costs \$10.00. Requires 4 1/2 yards 36 inch flared crepe and 1 1/2 yards 38 inch wide. Price 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the house dress which is the most desirable illustrated in our Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book in cents the copy.

## A Canadian Ambassador

American Paper Thinks We Should Have a Representative in U. S.  
It is years since it was arranged that Canada should have an ambassador to the United States. The Canadian Government has announced at different times that the appointment was upon the point of making. It has been asserted by friends of that government that the ambassador would be assigned to room in the right Canadian could be had. Either the right Canadian is a "white blackbird" or a "blackbird white", for there are 6,000, 000 Canadians and among them there must be some man capable enough and not too modest to serve Canada at Washington.

As a matter of business alone the Dominion needs an American ambassador. Canada is too old and great. Its interests too numerous and important, for the British ambassador to represent it indirectly, when Albion, Egypt and Haiti have representatives of their own in the United States. No British ambassador can handle Canada's business at Washington as advantageously to Canada as could a representative of the Ottawa government—Chicago Journal.

## Power From Ocean Tides

Preliminary permits for the hydroelectric development on Bonaville quoddy Bay, Maine, involving the utilization of the Bay of Fundy tide, was issued by the United States federal power commission to Dexter P. Cooper, Inc., New York City.

## Planning Moslem League of Nations

Over One Hundred Delegates to Attend Conference in Cairo

A Moslem league of nations, rivaling its counterpart at Geneva in potential importance, may be the outcome of a world conference of Moslems to be held at Cairo.

A hundred and fifty delegates, representing 200,000,000 Moslems will try to restore the unity of the Mohammedan world, shattered when Turkey overthrew its sultan for hundreds of years, also the caliph of Islam, and declared itself a republic under the presidency of Mustafa Kemal.

There are many candidates for the caliphate.

It is unlikely that sufficient unity will be maintained to permit of the election of a universal caliph.

Because of this disunity, the conference will discuss the formation of a permanent committee, representing all Moslem countries and headed by a chairman, who would be titular caliph, to constitute a league of Moslem nations.

## A Last Kick

The Agitator Now Receives No Sympathy in Ireland

A man with an Irish name and claiming New York as his place of residence is under arrest in the Irish Free State on the very serious charge of being involved in a plot to overthrow the government.

It might have been thought that when the people of the Irish Free State undertook the task of governing themselves the activities of Irish-American agitators would cease; but it is difficult to give up old habits. At least one man who has prospered by making war on John Bull in Ireland are reluctant to see their occupation so with the going of John Bull from Ireland, they regard it as a new grievance that their old one has been taken from them; but the chief significance of the arrest of Patrick Dineen is that it is a reminder of conditions as they used to be. The Ireland of today has apparently no more use for Irish-American agitation than John Bull had—St. Catharines Standard.

## Aeroplanes At High Altitudes

Airmen Will Be Able To Fight At Great Heights

There is little doubt that in the near air war airmen will fight, invisible from the earth, at heights between ten and twelve miles.

An ordinary engine develops but a fraction of its power at such altitudes, owing to the rarefaction of the air. Actual tests, however, made in conditions artificially reproduced to represent the state of the air at a height of ten miles with these engines are to be built will carry oxygen apparatus and will probably be alright. The crew, being totally enclosed, will produce their own atmosphere, as is done in submarines.

## France Exports Boat Race

Boat races, used for making smoking pipes of a popular variety, is so much in demand in America that it is necessary to import huge shipments from France to take care of the demand. As a result France in one year shipped last year valued at \$50,000, 000 francs to America.

Population of British Columbia  
British Columbia's population has shown considerable increase since the census of 1921, according to figures collected by government officials on the basis of school population. The total population of the province, set at 224,000 in 1921, is now nearly 600, 000, these figures show.

Some men are so sympathetic that they will even share your hat dollar with you.

## Boy Without Hands

Overcome Obstacles

Can Write Plainly and Teach Prize For Wood Carving

Greeting the loss of both his hands as a "challenge" instead of a misfortune, 14-year-old Vincent De Blasio is the proud possessor of the Philadelphia boy award, given annually to the boy who has shown the greatest earnestness and courage in overcoming obstacles.

Vincent lost his hands four years ago while dangling over a railroad bridge a wet rope attached to a stick that came in contact with a heavily charged electric wire. He hands were so badly burned that they had to be amputated above the wrists.

Young De Blasio's achievements were known to his teachers, but were not generally known until he submitted to the Boy Holby Pair, a festival of boy week, a study little child who had carved out of wood. An inspection revealed that he could write plainly, holding a pen between the stumps of his arms; he could work with tools in wood carving, and he spent his spare time as a clerk and messenger boy.

Vincent is the youngest of the five children of Mr. and Mrs. Presque De Blasio. His ambition is to become a lawyer, and his friends and teachers believe this ambition will be realized.

## Women Moneylenders

Ask Heavy Interest

Client in Liverpool Paid Forty-two Pounds For Five

In a court case figures were recalled showing that of 1,400 registered moneylenders in Liverpool about 1,100 of them were women. In one instance a woman client had paid 42 pounds in respect of a loan of five pounds, and then was used for two pounds additional. The moneylender lost the case.

## A Man Is Seldom Disappointed

In Love Until After Marriage

A perambulator is one kind of a good thing that few men care to push.

## Britain Best Bell Caster

Lost Art Was Rediscovered and Improved On

That Britain probably still leads the world in the art of bell-casting may be inferred from the news that the contract for the 15-ton bell for the 100-foot high Wampanoag store in Philadelphia has gone to the established firm of Gillett & Johnston, of Croydon.

Cyril Johnston, who has just returned from the United States, says that the art of bell casting and tuning was learned from Holland three centuries ago, then lost, and since rediscovered and improved upon by the British bell founder. The new bell is to be cast and tuned on this new system, which is known as the five-tone Simpson harmonic. This method insures that the bell will be in tune with itself, that it has at least five tones at correct intervals, so as to form a perfect musical chord.

## Probe Coal Supply

J. E. Armstrong, Conservative, London East, was chosen as chairman of the special committee of the house appointed to investigate Canada's present sources of anthracite and bituminous coal and silver matters in relation thereto as the first meeting of the committee. A. U. G. Barry, Conservative, Edmonton East, was named as vice-chairman.

Funny how delicate the fireman or engineer can make the whistle sound while passing a track which is moved down.

## AL. G. BARNES BIG 4-RING CIRCUS

Will Exhibit Afternoon and Night at Macleod on Sat. June 26

The announcement of Al. G. Barnes 4 ring circus appears in this issue. The Al. G. Barnes circus is one that always presents a clean, wholesome and entertaining program. This year, according to announcements, the circus has been greatly enlarged, and in addition to the all new spectacle of Pocabontas at the Court, Queen Anne with the enormous cast, selected from the 1080 employees, other new features are 180 horses in one big act, the Pen Ton Tribe of Arabs from the Sahara Desert—their first visit to America, the Canton Tramp of Chinese Circus Artists, the Imperial Mule Family from Bavaria, Joe Martin (himself), the giant gorilla man, Louis, the only performing hippopotamus in the world, and the famous exclusive Al. G. Barnes feature—40 dancing horses and 40 dancing girls and Al. G. Barnes appears in person at each performance.

According to the enormous size of the circus this year the management announces that no street parade will be given in any city visited; however, in place of the omitted procession, a mammoth open air free exhibition will take place on the show grounds at 1 and 7 p.m. immediately preceding the opening of the doors to the circus, and the largest travelling menagerie in the world, comprising over 400 rare animals from all quarters of the earth.

The circus performance starts promptly at 2 and 8 p.m. Ample parking space for autos is reserved on the show grounds and a city ticket office, where numbered reserved chairs may be obtained at same price charged on the show grounds, is maintained in each city.

## BUSINESS LOCALS

## The United Church

"Is Religion a Burden?" Does your religion prove a burden to you? Or, is it a power by which you are better able to carry your burdens? This will be the theme of the Sunday morning sermon at the United Church this coming Sunday, June 25.

At the evening service the local lodge of Masons, with visiting brethren, will worship with us, and the Rev. Geo. Welber will preach on "The Mission of Masonry."

A pre-communion preparatory service will be held in St. Andrew's Hall on the evening of Wednesday, June 23, to which all United Church members are desired to come, and others interested will be cordially welcomed. This service will be held at 8 p.m.

At the morning service on Sunday, June 27 the regular communion service will be held. This will be the closing Sunday of the pastorate of the Rev. Geo. G. Welber in Clareholm.

## Claresholm Garage Limited

## A FINE BATHROOM

Modern fixtures have another advantage—they are easier to keep clean than the old-fashioned kind. Those beautiful smooth white surfaces can be kept in a glossy condition with very little care—and there are no difficult corners where only an accident could hope to clean successfully. Drop in and see our display of bathroom fixtures.

## Vote Out the Party System!

What caused the organized farmers to enter the political field, and with the consent of the electorate, to take over the reins of government in Alberta five years ago? Principally, the cynical disregard of the needs of Western Canada's greatest industry by party politicians, and the failure of the party government formerly in power to provide clean and efficient administration.

Every other business and industry in Alberta is organized, and uses all the political pressure it can bring to bear to have its wishes passed into law. During the last session of the Alberta Legislature, deputations representing organizations of manufacturers, labor unions, doctors, lawyers, dentists, livestock dealers, etc., put their views before the members of the house. This is right and proper, but why are the farmers denounced for organizing for the purpose of securing representation in the House? The reason is that the U. F. A. interferes with the working of the party system.

Alberta is primarily an agricultural province. Legislative action is required to secure lower freight rates, encourage efficient marketing, build better roads, and generally secure the welfare and prosperity of the farming community.

The party system would not be alive today but for the nucleus of city politicians who revive it every election. Hundreds of city orators are speaking in every part of Alberta during this election, endeavoring to divide the farmers into opposing groups. The overtures made for a business government, with city representatives co-operating with rural members on non-party lines, have been rejected, except by labor.

## Party System Inefficient

The party system has proved inefficient in administration as compared with the co-operative system. Here are some additional comparative figures: Land Titles Office Costs, 1921, \$241,909; 1925, \$156,753; Election Costs, 1921, \$248,000; 1923 Plebiscite, \$233,000; Estimated Election Costs, 1926, \$193,000. Reductions in controllable expenditures, 1921 to 1924 inclusive, Alberta 14 per cent, Saskatchewan 12 per cent, Manitoba 81 per cent. Increases in all other provinces. Agricultural Education, 1921, 320 students, \$191,000; 1925, 360 students, \$103,000. Many other instances can be given.

The U. F. A. are expending a considerable sum in advertising through the weekly press, the funds for this being contributed by the membership, so that the electors may know the truth. The city newspapers are endeavoring to perpetuate the party system.
